

Certificate of Restoration

Model: 000000 Serial Number: 000000 Date: 01/01/10

This equipment has been restored and is in compliance with all manufacturers specifications.

All areas of the main frame and accessories have been inspected and categorized prior to undergoing a thorough cleaning process.

Main assemblies and sub assemblies then begin a 77 step process that is documented with each Restored system.

Critical parts that have designated life cycles by the original equipment manufacturer (OEM) are replaced 100% of the time, as are parts that show any sign of wear or damage.

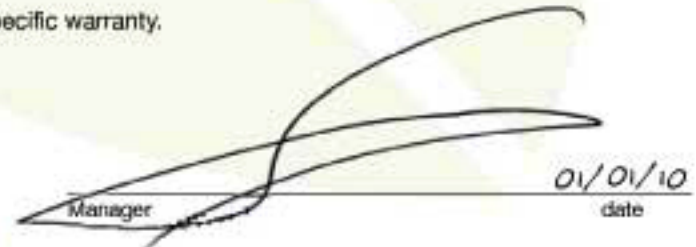

RDS Restoration standards and processes are established based upon criteria outlined in OEM product specifications and by Underwriters Laboratory, Inc.

These procedures were completed in accordance with Restored Digital Solutions, LLC Process standards.

This certificate neither states nor implies any specific warranty.
